

CONTRACT AND COMPLIANCE RENEWAL TRACKER

Every renewal date and notice window, on one live dashboard.

A contract and compliance renewal tracker, designed by a lawyer for operations, legal and admin teams.

THE PROBLEM

Most teams track renewals in someone's memory, or in a spreadsheet that went stale months ago. The dates exist. They are just buried in documents nobody rereads until it's too late.

HOW IT WORKS

WHAT YOUR TEAM GETS

- ✓ A live dashboard: every renewal, expiry and notice date ranked by urgency, value and owner
- ✓ English and Spanish documents in the same intake
- ✓ A review trail: who confirmed each record, and when
- ✓ Reminders 60, 30 and 7 days before each deadline
- ✓ Conflicting clauses flagged, never guessed

WHERE ELSE IT FITS

- Vendor and SaaS contracts, so no auto-renewal ever surprises you
- Licenses, permits and insurance renewals
- Client contracts, with renewal conversations started on time
- Leases across several locations
- Employee certifications and training renewals
- Compliance filings and regulatory deadlines
